Examples 12 and 13: Documents retrieved from CD-ROM products

Example 12: JP 0800085 A (TORAY IND INC), (abstract), 1996-05-31. In: Patent Abstracts of Japan [CD-ROM].

Example 13: Hayashida, O. et al.: Specific molecular recognition by chiral cage-type cyclophanes having leucine, valine, and alanine residues. In: Tetrahedron 1955, Vol. 51 (31), p. 8423-36. In: CA on CD [CD-ROM]. Columbus, OH: CAS. Abstract 124:9350.

14. It is recommended that any document (reference) referred to in paragraph 7 above, and cited in the search report should be indicated by the following letters or a sign to be placed next to the citation of the said document (reference):

(a) *Categories indicating cited documents (references) of particular relevance:*

Category "X": The claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone; Category "Y": The claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

(b) *Categories indicating cited documents (references) of other relevant prior art:*

Category "A": Document defining the general state of the art which is not considered to be of particular relevance;

Category "D": Document cited by the applicant in the application and which document (reference) was referred to in the course of the search procedure. Code "D" should always be accompanied by one of the categories indicating the relevance of the cited document;

Category "E": Earlier patent document as defined in Rule 33.1(c) of the Regulations under the PCT, but published on or after the international filing date;

Category "L": Document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (the reason for citing the document shall be given);

Category "O": Document referring to an oral disclosure, use, exhibition or other means;

Category "P": Document published prior to the filing date (in the case of the PCT, the international filing date) but later than the priority date claimed in the application. Code "P" should always be accompanied by one of the categories "X," "Y" or "A;"

Category "T": Later document published after the filing date (in the

case of the PCT, the international filing date) or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention;

Category "&": Document being a member of the same patent family or document whose contents have not been verified by the search examiner but are believed to be substantially identical to those of another document which the search examiner has inspected.

15. The list of cited documents (references) given in the search report should indicate, conforming to the generally recognized practice of the International Searching Authorities under the Patent Cooperation Treaty, the respective claim(s) of the patent application to which the citation is considered to be relevant.

16. The category codes referred to in paragraph 14, above, are intended primarily for use in the context of search reports accompanying published patent applications. However, if industrial property offices wish to indicate the relevance of cited documents (references) listed on the first page of a published patent application, they should print the category codes in parentheses, immediately after each citation.

Note: Further detailed information on definitions of terms used in this Standard or on the inclusion of references cited can be found in International Standard ISO 690:1987, "Documentation—Bibliographic References—Content, Form and Structure." Guidance for the abbreviation of titles of articles can be obtained through International Standard ISO 4:1997, "Information and Documentation—Rules for the Abbreviation of Title Words and Titles of Publications."

Examiners are encouraged to speak to a PTO librarian or technical information specialist when they find that crucial elements to the citation are lacking in their records.

The information specialist will work with the examiner to verify dates, authors, and other elements as needed.

Notes:

1. These elements are to be indicated only in a search report.

2. The elements of item (v), having relevance to a corrected patent document, should be indicated together with the other data referred to under subparagraph 12(a)(i) to (iii).

3. Where a surname can be identified, forenames or initials should follow the surname. Such surnames and initials should be given in capital letters.

4. When the year of publication coincides with the year of the application or of the priority claim, the month and, if necessary, the day of publication of a monograph or parts thereof should be indicated in accordance with the provisions set out in WIPO Standard ST.2.
